DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/21/2005 has been entered.
2. Applicant's amendment dated 03/21/2005 has been received and entered. By the amendment, claims 8-18, 25-40, 46, 48-52 are remain pending in the application.
3. Applicant's arguments with respect to claims 8, 15, 33, 46 and 49 have been considered but are moot in view of the new ground(s) of rejection.

Specification

The amendment filed 03/21/2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the amendment found throughout the specification has the purpose of replace the old equation $d = \lambda/(2\sin\theta) \times m$ by the new equation $d = \{\lambda/(2\sin\theta)\} \times m$ in order to overcome the rejection in the previous office action since "m", according to the old equation, being in the lower in the old equation (i.e., $d = \lambda/((2\sin\theta) \times m)$, math operation power rule). Such amendment amounts to a change of the scope of the invention (i.e.,

Art Unit: 2871

“m” is in the upper equation), and the added scope constitutes new matter. Applicant is required to cancel the new matter in the reply to this Office action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 8-18, 25-40, 46, 48-52 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 8, 15, 33, 46 and 49, they have been contained the material which is not supported by the original disclosure; and the amendment to the specification introduces new matter into the disclosure as described above.

Applicant is required to cancel the new matter in the reply to this Office action or it must be re-filed as a continuation-in-part of the parent application with a new oath/declaration.
